„Choose a job you love, and you will never have to work a day in your life.” - Confucius

ABOUT ME

I have been interested in programming since I was a child. I created my first application in 1991 - a text game in BASIC for Atari. Later, more simple programs in Amos - Amiga.

I love starting new projects and I'm open to learning new things. I always use the newest technologies. In my work, I value clear code, simple and effective solutions. Very often I create several versions of the same functions and choose the best one, which I then optimize. I pay a lot of attention to performance and security. I consider myself a versatile person, I can adapt to different environments and learn new technologies quickly.

HISTORY

1991- 2000	Atari BASIC / Amiga Amos	
2000 - 2005	Visual Studio (Windows)	First commercial projects
2000 - 2015	Webpages / apps	Fullstack (php / mysql / js)
2015	Mobile	React Native / F7 / Swift
2017	Web apps	React / Vue / F7

LAST PROJECT

<https://veventy.com> VUE (Nuxt) / F7

veventy is the simple and intuitive platform for manage online and hybrid events. Running an event on this platform is a unique experience thanks to many modern solutions for both organizers and participants.
